WOOD COATINGS

Passion for wood

1K Waterborne solution for wood species prone to bleeding

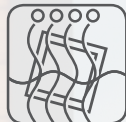

Waterborne translucent midcoats for components made of hardwood and softwood, for dipping and flowcoat (CETOL® WM 6900-02) or spray (CETOL® WM 6900-03) application. CETOL® WM 6900-XX gives good isolating properties against discoloring tannin extracts, without addition of heavy metals.

- **Low amount of process foam during application**
- **Fast drying / hardness development**
- **Good sandability**
- **Good outdoor durability**
- **Very good anti tannin bleeding resistance**
- **Good transparency on both wet-film and wood**
- **Natural look on wood**

**Replaces
CETOL® WM 675
& WM 680**

Technology:
Waterborne 1K

Application:
Flowcoat
(CETOL® WM 6900-02)

Application:
Spraying
(CETOL® WM 6900-03)

Shelf life:
24 months

Color:
Translucent

Durability:
Excellent
Included in Extralife 7Y

Application temp:
Minimum: 15 - 25°C for
substrate at 60% RH

Sustainability:
Waterborne
